

# Now & Next New School Update

September 2017 Issue

Dear Parents,

It gives me great pleasure to offer you an update on the exciting progress of our new site. As I hope you are aware, we hope to move the Secondary students to this site in 2018 allowing us to further develop our current SS1 campus for our younger students.

Progress is going well and as you can see from the construction photos below, the school is taking shape. The site contains a 400 seater auditorium, a large Library, bespoke Science laboratories, state of the art ICT, DT, Drama and Music facilities, a 25m swimming pool, a football pitch, two full size basketball courts and a fitness gym alongside contemporary teaching spaces.

We recently took a small number of parents to the site who had asked for more information about the location of electricity pylons. These are currently some distance from the actual site and the entire area will be a residential area. Tests conducted at the site, with parents, showed that the electrical radiation is no different to that experienced in the centre of the Phu My Hung residential spaces.

As you can see, there is still much work to do but I look forward to being able to invite parents to the site in the near future.

A map of the location is also included below along with some artists' impressions of the finished spaces.
